

# Hydrolith BS-ZX plus

## Fountain Solution Concentrate for Sheetfed Presses

Cetificate

#### Product Usage

Fountain Solution Concentrate - with strong Alcohol Replacing Additives - for Sheetfed Offset Presses

#### Features and Benefits

- Strong alcohol replacement additives allow to eliminate IPA
- with Fogra Certifiate
- effective buffer cleans the oxide surface thoroughly
- very stable ink and water balance safe printing process with broad window
- very fast start up of the plate minimizes waste
- prevents or minimizes framing (copy on impression cylinder)
- easy switching over to alcohol-less printing: cost saving!
- lower dosage compared to other alcohol-less founts: cost saving!
- prevents contamination of the circulation fountain solution stays clear
- also recommended for Fuji PRO-T3 plates and Silver Digiplates

Storage and Shelf Life

Storage: not under 6°C, not above 30°C Shelf Life: 12 months Keep container tightly closed Keep away from direct sun light

#### Directions

Dosage of Hydrolith BS-ZX Plus: 3-5% depending on the water hardness

Dosage of IPA: 0-2% depending on the circumstances

For a successfull elimination of alcohol it necessary: Fountain Solution Cooling System, standardized water quality, appropriate adjustment of the rollers, eventually ceramic or special rollers. If standard rollers are in use the ductor speed might be increased considerable. This does not mean that more water is transferred and emulsified into the ink!

Please see also the Download "Printing without alcohol".

For water hardness up to ca. 15° dH / 270 ppm

### **Technical Specifications**

form: liquid

Density: 1,040 g/cm3

• Color: transparant -slightly yellowish/brown

Odour: mild - characterisitc

• Water miscible: yes

• pH value: 4,2

• labelling: Xi Irritating

Packaging

20 liter cans, 200 liter drums
