

Supremo UV

Allround Blanket for UV Printing

Product Usage

blanket for UV and hybrid inks

Features and Benefits

- universal usage: paper, carton
- excellent ink transfer, dense and equal solids
- the EPDM cover makes very resistant against UV-inks and UV washes
- reduces piling of paper dust - reduces wash cycles
- very good resistance to edge marking and smashes
- special micro ground surface - leads to sharp dot reproduction, excellent ink transfer and fast paper release
- very robust through 4 layer construction - for long runs and high speed presses
- high durability

Directions

for sheet-fed presses - also high speed - UV and Hybrid inks

for us with all paper types, cartons

for conventional inks

Technical Specifications

- Construction: 4-layers, compressible
- Surface: micro ground, 0,6 µm Ra
- Micro/Total Hardness: app. 55°/78° Shore A
- Thickness: 1,96mm
- color: violett

Storage and Shelf Life

Store in a cool and dry place

Expire time: 12 months
