

Hydrolack DS 15

Primer Overprint Varnish - Water based

Description:

Non-enhancing Overprint Varnish for paper and carton with a high drying speed. With the appropriate selection of the substrate a neutral finish with a good scuff and block resistance can be achieved. Recommended for general sealing work and rapid post printing converting.

Application:

With varnishing units on sheet fed presses a wet film of 3-6 g/m² is recommended for most cartons. Higher film weights are achievable with the appropriate drying equipment. Mix well before use! Storage not above 34°C. Protect from freezing! Check viscosity before use.

Technical Datas:

Viscosity:	35-40 seconds DIN cup No. 4 at 24°C
Gloss:	Neutral
Drying Speed:	High
Rub resistance:	Good
Slip:	Good
pH-value:	7,7 - 8,4
Work and Turn:	Yes
Gluable:	Yes

Packaging:

10/20 kg Can, 120/220 kg Drum, 1.000 kg IBC
