

UV Wash 60

Wash for UV inks

Product Usage

UV blanket and roller wash for automatic blanket cleaning systems and for manual use. Recommended only for EPDM material.

Features and Benefits

- Very high solvency power for a fast and thorough cleaning process
- Flash point above 60°C - safe handling
- Very low rubber swelling effect – gentle to UV rollers and blankets (EPDM material)
- Good water-miscibility – removes ink and paper dust efficiently
- Medium fast evaporation - without greasy residues
- High material compatibility

Packaging

20 L cans, 200 L drums, 1.000 L IBCs

Directions

Connect UV Wash 60 to automatic cleaning system or use manually.

Recommended for daily use.

If used in automatic cleaning systems, first spray UV Wash 60 (not water) to achieve better cleaning results.
