

Test Certificate

for the washing agent

"UV-WASH 60"

of the company

HUBER GMBH

The washing agent "UV-WASH 60" was tested by Fogra according to the following evaluation criteria as specified by Heidelberger Druckmaschinen AG:

- Chemical resistance of wash-up, plate dampening and inking rollers, printing blankets, materials used for hoses and seals, material of printing press parts which are in direct contact with the detergent and printing plates.
- Miscibility with water and hydrocarbons,
- Flash point (with a flash point of more than 55°C the detergent is harmless concerning technical safety),
- Residues remaining after evaporation.

This test certificate is valid for sheet-fed machines of the Speedmaster series which were produced in 1995 and later and equipped with material that is only suitable for UV printing. It is only valid for the chemical composition which was presented to Fogra on 10th March 2009.

The wash IS NOT suitable for printing presses equipped with materials that are only suitable for an alternating production with UV and conventional printing inks.

The legally binding approval of the above mentioned cleaning agent is given electronically and its up-to-date version is available in the form of the approval list on Fogra's website (www.fogra.org).
